

CL70PE (Electronic Controls) CL70PM (Mechanical Controls)

2X Blowers for powerful air flow

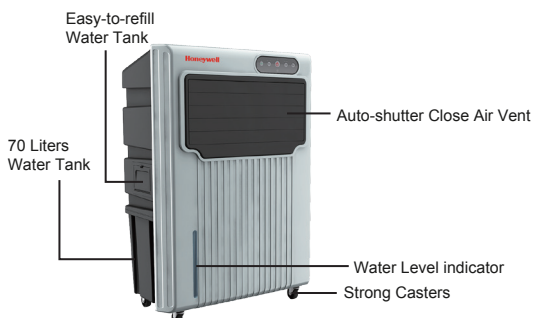

ASPB (Auto-Start on Power Back) Function*

AUTO SHUTTER CLOSE on power off*

HM2 Honeycomb media on 2 sides for improved cooling performance.

4D AUTO-CONTROLS allows for four directional manoeuvring of the louvers for air distribution.*

The new Airtek CL70PE and CL70PM are just the right choice for use in high demanding applications like Large Size Rooms, Restaurants, Warehouse, Factory floors and Event halls. It is equipped with two powerful air blowers for extremely high air throw and the unique ASPB* function has a memory to resume operation in the same position in case of a power cut. The 'Auto Shutter Close' has multiple benefits, as it keeps your cooler dust-free, closes on its own and also keeps the mosquitos breeding away during non-operation times. 70 Liters massive water tank, adjustable humidification and continous water supply connection, easy-to-use controls, 2-sided honeycomb pads, Mesh filter for pure air and unique cord wrap are some additional features which allows for optimum cooling, reduced maintenance cost and hassle-free operations.

Features / Specifications :

- | | |
|---|---|
|  Powerful Air Flow 800 m ³ /hr |  4 Directions Oscillating Louvers For Air Distribution |
|  Mesh filter (Optional) helps to block dust, insects and sediments from entering inside the cooler |  Power Consumption 250 Watts |
